CONTENTS

Volume 24, 1957

AL-SALAM, W. A. The Bessel polynomials 529

AMBROSE, W. A theorem of Myers 345

ARSOVE, MAYNARD G. Mass distribution for products of subharmonic functions 215

BALL, B. J. The normality of the product of two ordered spaces 15

BATHO, EDWARD H. Non-commutative semi-local and local rings 163

BELLMAN, RICHARD. The expansions of some infinite products 353

BHATT, S. N. AND PRASAD, B. N. The summability factors of a Fourier series 103

BLUM, J. R. AND ROSENBLATT, MURRAY. A class of stationary processes and a central limit theorem 73

BRAUER, ALFRED. A new proof of theorems of Perron and Frobenius on non-negative matrices: I. Positive matrices 367

BRAUER, ALFRED. The theorem of Ledermann and Ostrowski on positive matrices 265

BROWDER, FELIX E. Non-linear functional equations in locally convex spaces 579

CAPEL, C. E, AND STROTHER, W. L. A theorem of Hamilton: counter-example 57

CARLITZ, L. A note on the Bessel polynomials 151

CARLITZ, L. Some polynomials related to theta functions 521

CARLITZ, L. AND UCHIYAMA, S. Bounds for exponential sums 37

CURTIS, M. L. An imbedding theorem 349

DAVIS, PHILIP AND FAN, KY. Complete sequences and approximations in normed linear spaces 183

DELEEUW, K. Functions on circular subsets of the space of n complex variables 415

DEVINATZ, A. Two parameter moment problems 481

DRESSEL, F. G., MCLEOD, R. M. AND GREGEN, J. J. Uniqueness of mapping pairs for elliptic equations 173

EASTERFIELD, T. E. Matrix norms and vector measures 663

ELLIS, ROBERT. Locally compact transformation groups 119

FAN, KY, AND DAVIS, PHILIP. Complete sequences and approximations in normed linear spaces 183

FRIEDMAN, AVNER. Classes of solutions of linear systems of partial differential equations of parabolic type 433

FRIEDMAN, AVNER. Oscillatory solutions of nonlinear autonomous differential equations of order higher than two 561

GABRIEL, R. F. A generalized Schwarzian derivative and convex functions 617

GERGEN, J. J., MCLEOD, R. M., AND DRESSEL, F. G. Uniqueness of mapping pairs for elliptic equations 173

GOFFMAN, CASPER. A property of integral means 505

HAMILTON, O. H. A theorem of Hamilton: Correction 59

HARTMAN, PHILIP. Self-adjoint, non-oscillatory systems of ordinary, second order, linear differential equations 25

HAYNSWORTH, EMILIE V. Note on bounds for certain determinants 313

HERSTEIN, I. N. Certain submodules of simple rings with involution 357

HOPF, EBERHARD. The temporal behaviour of a wave packet 477

HUFFORD, GEORGE. One-parameter semi-groups of maps 443

ISEKI, SHÔ. The transformation formula for the Dedekind modular function and related functional equations 653

ITÔ, SEIZÔ. A boundary value problem of partial differential equations of parabolic type 299

JANS, JAMES P. Compact rings with open radical 573

JEWETT, JOHN. Differentiable approximations to interior functions 227

KOCH, R. J. Note on weak cutpoints in clans 611

KOCH, R. J., AND WALLACE, A. D. Stability in semigroups 193

KULIK, STEPHEN. A method for approximating the zeros of analytic functions 137

KRULE, I. S. Structs on the 1-sphere 405

LAX, PETER D. Asymptotic solutions of oscillatory initial value problems. 627

LEE, C. N. Covering spaces and simple connectedness 547

LORCH, LEE AND SZEGO, PETER. Corrections and a remark to: a singular integral whose kernel involves a Bessel function 683

LOTKIN, MARK. The diagonalization of skew-Hermitian matrices. 9

LOUD, W. S. Behavior of certain forced nonlinear systems of second order under large forcing 235

LOUD, W. S. Boundedness and convergence of solutions of $x'' + cx' + g(x) = e(t)$ 63

MACDUFFEE, C. C. Curves in Minkowski space 379

MCCARTHY, PAUL J. The existence of indefinite ternary genera of more than one class 19

MCLEOD, R. M., GERGEN, J. J. AND DRESSEL, F. G. Uniqueness of mapping pairs for elliptic equations 173

MARCUS, MARVIN. Convex functions of quadratic forms 321

MARCUS, M. AND THOMPSON, R. A note on symmetric functions of eigenvalues 43

MEYERS, LEROY F. Minimizing transformations of Hermitian functionals, and product integration 391

MIRSKY, L. Inequalities for normal and Hermitian matrices 591

MOHAT, JOHN T. Concerning spirals in the plane 249

NUMAKURA, KATSUMI. Prime ideals and idempotents in compact semigroups 671

O'NEILL, BARRETT. A fixed point theorem for multi-valued functions ... 61

PAYNE, L. E. AND WEINBERGER, H. F. Remark on a paper of O. G. Owens 233

PRASAD, B. N. AND BHATT, S. N. The summability factors of a Fourier series 103

PROTTER, M. H. A generalization of completely convex functions 205

RIM, DOCK SANG. Relatively complete fields 197

ROSENBERG, ALEX AND ZELINSKY, DANIEL. Tensor products of semiprimary algebras 555

ROSENBLATT, MURRAY AND BLUM, J. R. A class of stationary processes and a central limit theorem 73

SAVAGE, NEVIN. Weak boundary components of an open Riemann surface 79

SCHOENFELD, LOWELL. The order of the zeta function near the line $\sigma = 1$. 601

SIMON, ARTHUR B. n-cyclic elements. I 1

SIMON, ARTHUR B. n-cyclic elements: correction 681

SINGH, BASUDEO. Definite divergence of the conjugate Fourier series ... 647

SLYE, JOHN MARSHALL. Collections whose sums are two-manifolds 275

SPITZER, FRANK. The Wiener-Hopf equation whose kernel is a probability density 327

STEIN, ELIAS M. Interpolation in polynomial classes and Markoff's inequality 467

STERNBERG, SHLOMO. Local C^n transformations of the real line 97

STROTHER, W. L. AND CAPEL, C. E. A theorem of Hamilton: counter-example 57

SZEGO, PETER AND LORCH LEE. Corrections and a remark to: a singular integral whose kernel involves a Bessel function 683

TAAM, CHOY-TAK. The solutions of nonlinear differential equations. III . 511

THOMPSON, R. AND MARCUS, M. A note on symmetric functions of eigenvalues 43

WALLACE, A. D. AND KOCH, R. J. Stability in semigroups 193

WASOW, WOLFGANG. Asymptotic development of the solution of Dirichlet's problem at analytic corners 47

UCHIYAMA, S. AND CARLITZ, L. Bounds for exponential sums 37

WEINBERGER, H. F. AND PAYNE, L. E. Remark on a paper of O. G. Owens 233

WHAPLES, G. Algebraic extensions of arbitrary fields 201

WHAPLES, G. Galois cohomology of additive polynomial and n-th power mappings of fields 143

WINTNER, AUREL. Comments on "flat" oscillations of low frequency 365

WRIGHT, FRED B. Hölder groups 567

YACOUB, R. K. Semi-special permutations II: Semi-special permutations on $[p^\alpha]$ 455

ZELINSKY, DANIEL AND ROSENBERG, ALEX. Tensor products of semi-primary algebras 555

ZEMANIAN, ARMEN H. Bounds on the Fourier transforms of monotonic functions 499

ZINK, ROBERT E. A note concerning regular measures 127
